

CV- Dr L van Wyk

CURRENT

Dr van Wyk graduated from the University of Stellenbosch in 2000. She has 2 postgraduate diplomas and has completed several international courses. Her main interests are paediatric dentistry, aesthetic restorative bonding, minimal invasive veneers and full rehabilitations. Dr van Wyk is passionate about the use of modern direct adhesive techniques and materials in a minimally invasive approach to help restore beauty, health and function.

After graduating from the University of Stellenbosch, Loudine worked in private practice and National Health Service in the United Kingdom. Returning to South Africa in 2015, she started to work at Scholtz and Williams Dental Practice in George, her hometown. She achieved her Postgraduate Diploma in Paediatric Dentistry and in Aesthetic dentistry at the University of Western Cape.

After years of postgraduate training, she has developed a deep interest and understanding of reconstructive dentistry in a conservative manner.

Dr van Wyk said that being a dentist is more than just a job, as she loves the creativity and interaction with people. "My aim at the end of treatment is to ensure that all patients under my care have healthy teeth, gums, improved aesthetics and function, using the latest innovate scientific techniques."
